Propane Tanks Should Never Go In Your Recycle Bin

Propane has many uses: it can be used for space and water heaters, cooking stoves, and in equipment such as forklifts, generators, and mowers.

Propane tanks are filled with pressurized gas and therefore require special disposal. They should never be placed in your recycle bin, cart, or at the drop off sites. Propane cylinders pose a serious risk to workers at the MRF (Materials Recovery Facility) because they can cause fires or explosions. Even empty cylinders remain pressurized and can explode if compacted.

Tank manufacturers recommend that consumers return unusable propane tanks to a local distributor. Propane tanks can be refilled and exchanged. Check [Amerigas](#) and [Blue Rhino](#) websites for locations to refill and/or exchange tanks.

Watch the video below on how Blue Rhino recycles used propane tanks.
